Weekly Report

Overview

This week focused on project initiation, team organization, and the first stages of development. We completed onboarding activities, decided on our project idea, distributed responsibilities among team members, and began active work on design and implementation.

Daily Activities

Day 1

- Introduction and onboarding session.
- Completed necessary documentation.
- Met and identified assigned mentors.
- Attended an initial workshop.

Day 2

- Discussed and finalized the project idea.
- Defined responsibilities for each team member.
- Documented project scope and individual tasks.

Days 3–5

- Active project work by the entire team.
- My contributions included:
  - Designing the login page.
  - Creating the main page layout.
  - Working on the design in **Figma**.
  - Developing the front end in **React**.

Completed Tasks

- Project idea established and documented.
- Login page implemented.
- Main page design created in Figma.

Milestones Reached

- Successful onboarding of all team members.
- Project scope and task allocation completed.
- Initial front-end implementation started.

Contributions

- Designed and developed the login page.

- Created the structure and design of the main page.

- Contributed to the project's visual and user interface direction.

Training and Workshops

- Attended one workshop on the first day (Introduction and orientation).
